

What is HP Insight Control and how does it add benefit?

HP Insight Control enables organisations to transform their datacentres through time-smart management software that delivers total control, maximum flexibility and tangible savings for ProLiant and BladeSystem infrastructures.

Based on HP Systems Insight Manager and ProLiant Essentials software, the HP Insight Control suite delivers comprehensive system health, remote control, vulnerability scanning and patch management as well as flexible deployment, virtual machine management and power management – all in one easy to install package, with streamlined licensing.

Insight Control Suites

Insight Control Suites

Questions you may be asked

- **When does the support and update entitlement period begin?**

The support and update period begins on the date of software purchase. Customers cannot receive support or updates without first registering their service entitlement.

- **My customer wants to purchase 3 years of support and update services/wants to purchase the contract extensions when they purchase the software license. What options are there?**

HP is offering 3 year Insight Control/ProLiant Essentials Care Packs, which extend the 1 year of 24 x 7 software Technical Support & Update Service that comes as standard. Take advantage of these Care Packs to bring your software support to the same level as your hardware support. Customers that register for this service will receive renewal notifications at 120, 90, 60, and 30 days and directly prior to expiration.

To activate the Technical Support and Update Service, see the registration link at: www.hp.com/go/insightcontrol

Benefits of having support

Software Technical Support and Update Service

The 24 x 7 HP Software Technical Support and Update Service provides access to HP technical resources for assistance in resolving software implementation or operations problems. The service also provides access to software updates and reference manuals either in electronic form or on physical media as they are made available from HP (customers who purchase an electronic license to use are eligible for electronic updates only). With this service, Insight Control and ProLiant Essentials customers will benefit from expedited problem resolution as well as proactive notification and delivery of software updates. For more information about this service, see <http://www.hp.com/services/insight>

Management Security (<http://www.hp.com/servers/manage/security>)

HP is proactive in its approach to the quality and security of all its management software. Be sure to check this website often for the latest downloadable security updates.
